CLINICAL PERFORMANCE REPORT

2026

A complete KPI Report

Tracking performance indicators across programs to measure quality of care and clinical outcomes.

TABLE OF CONTENTS

→	01	Program Completion
→	02	Client Satisfaction
→	03	Average Length of Stay
→	04	GAD-7 & PHQ-9 Results
→	05	Key Takeaways

Program Completion

Successful completion rate measures the amount of admitted clients who remain in care through the full completion of their clinically recommended treatment plan.

National studies do not include PHP data.

Source: 2024 Treatment Episode Data Set (TEDS) report.

*These national percent averages include both *completed* AND *transferred to another treatment program or facility*. Please note that "transferred" often refers to clients who continued treatment at another facility – not necessarily that treatment was successfully completed – likely making the combined percentages more favorable.

Inpatient

All In Solutions offers inpatient services (detox and residential treatment) at two locations in Florida and California. Across these locations, **722** clients were discharged in 2025. **584** of those clients were discharged upon successful completion of the program. **84** left the program voluntarily before completion. **37** were transferred to another provider because their medical or psychiatric needs required a higher level of care. **12** were either considered non-admitted as their stay lasted <48 hours, or discharged by administration.

Outpatient

All In Solutions offers outpatient services (PHP and IOP) at three locations in Florida, New Jersey, and California. Across these locations, **1,435** clients were discharged in 2025. **1,155** of those clients were discharged upon successful completion of the program. **139** left the program voluntarily before completion. **72** were either discharged by administration, or stayed <48 hours. **63** were transferred to another provider because their medical or psychiatric needs required a higher level of care.

Client Satisfaction

As part of our commitment to ensuring that each clients' individual needs are met, comprehensive client satisfaction surveys are administered at discharge. The survey asks clients to rate many aspects of their treatment experience, including an overall rating of the treatment program, the quality of the counseling staff, how well their treatment plan addressed issues they identified as important, and the value of their individual therapy sessions.

Note: Not all clients chose to answer the satisfaction survey. The satisfaction scores in this report are based on all 1,612 client surveys completed in 2025. Percentages below were calculated by averaging scores across multiple sections where "Excellent" = 5 and "Poor" = 1.

94%

of clients were satisfied with their **overall experience** at All In Solutions' facilities.

Facilities & Amenities

93%

Accommodations

95%

Safety

Percent of clients satisfied with the accommodations and safety of our facilities.

Clinical Experience

96%

of clients were satisfied with the treatment planning AIS provided.

93%

of clients felt their medical needs were addressed and handled appropriately.

96%

of clients were satisfied with the therapists at AIS' facilities.

95%

of clients were satisfied with the education AIS provided.

Average Length of Stay

16.2

All In Solutions Wellness Center

Detox/Residential - West Palm Beach, FL

In 2025, the average client stay at All In Solutions Wellness Center in West Palm Beach, including detox and residential care, was 16.2 days.

17.5

All In Solutions Detox

Detox/Residential - Simi Valley, CA

In 2025, the average client stay at All In Solutions Detox in Simi Valley, including detox and residential care, was 17.5 days.

28.5

All In Solutions Counseling Center

PHP/IOP - Boynton Beach, FL

In 2025, the average client stay at All In Solutions Counseling Center in Boynton Beach, including PHP and IOP, was 28.5 days.

46.8

All In Solutions California

PHP/IOP - Simi Valley, CA

In 2025, the average client stay at All In Solutions California in Simi Valley, including PHP and IOP, was 46.8 days.

32.4

All In Solutions Cherry Hill

PHP/IOP - Cherry Hill, NJ

In 2025, the average client stay at All In Solutions Counseling Center Cherry Hill, including PHP and IOP, was 32.4 days.

GAD-7/PHQ-9 Averages

The Generalized Anxiety Disorder - 7 (GAD-7) and Patient Health Questionnaire - 9 (PHQ-9) are short screening measures used in medical and community settings to assess anxiety and depression severity. Below are the Client Scale Averages Pre/Post Discharge.

GAD-7

AVG. UPON INTAKE

- **AISWC** (FL; Detox/Residential): 12.47
- **AISD** (CA; Detox/Residential): 15.43
- **AISBB** (FL; PHP/IOP): 6.55
- **AISCA** (CA; PHP/IOP): 6.76
- **AISCH** (NJ; PHP/IOP): 8.07

Avg GAD-7 **Inpatient**
Score Decrease

Avg GAD-7 **Outpatient**
Score Decrease

AVG. UPON DISCHARGE

- **AISWC** (FL; Detox/Residential): 8.97 **(-3.50)**
- **AISD** (CA; Detox/Residential): 11.34 **(-4.09)**
- **AISBB** (FL; PHP/IOP): 3.47 **(-3.08)**
- **AISCA** (CA; PHP/IOP): 3.83 **(-2.93)**
- **AISCH** (NJ; PHP/IOP): 2.95 **(-5.12)**

Avg % decrease of anxiety in clients who completed a full continuum of care in our **Florida** facilities. (GAD-7 **12.47** to **3.47**)

Avg % decrease of anxiety in clients who completed a full continuum of care in our **California** facilities. (GAD-7 **15.43** to **3.83**)

PHQ-9

AVG. UPON INTAKE

- **AISWC** (FL; Detox/Residential): 13.05
- **AISD** (CA; Detox/Residential): 15.75
- **AISBB** (FL; PHP/IOP): 7.12
- **AISCA** (CA; PHP/IOP): 6.43
- **AISCH** (NJ; PHP/IOP): 8.39

Avg PHQ-9 **Inpatient**
Score Decrease

Avg PHQ-9 **Outpatient**
Score Decrease

AVG. UPON DISCHARGE

- **AISWC** (FL; Detox/Residential): 9.21 **(-3.84)**
- **AISD** (CA; Detox/Residential): 11.90 **(-3.85)**
- **AISBB** (FL; PHP/IOP): 3.55 **(-3.57)**
- **AISCA** (CA; PHP/IOP): 3.72 **(-2.71)**
- **AISCH** (NJ; PHP/IOP): 2.91 **(-5.48)**

Avg % decrease of depression in clients who completed a full continuum of care in our **Florida** facilities. (PHQ-9 **13.05** to **3.55**)

Avg % decrease of depression in clients who completed a full continuum of care in our **California** facilities. (PHQ-9 **15.75** to **3.72**)

From these averages, we can see AIS clients are positioned for success at discharge (extensive insight into the disease of addiction, low cravings to use, etc.), with anxiety and depression scores significantly decreased in those who complete a full treatment program.

Key Takeaways

More Than Numbers

At All In Solutions, we recognize that each client is far more than a number. At the same time, we believe transparent, accessible, and measurable treatment data is essential in demonstrating the quality of care we provide. By making this information publicly available, we help individuals and families seeking support make informed decisions with confidence. Throughout 2026 and beyond, we remain committed to advancing the standard for both clinical excellence and transparency in addiction treatment.
